

The "Third Pole" Project Manager

Since 1996, the Marek Kamiński Foundation helps the ailing children and youth to overcome barriers and make their dreams come true.

It executes its statutory objectives through various activities and pursues the charitable, ecological as well as educational projects. Among others, it organizes workshops, camps and ventures for the underprivileged children in order to provide them with psychological support and present a number of opportunities that stand open for them.

The Foundation raises funds for the organization of the European Camps for the Poles Conquerors, for which children with chronic illnesses, disabilities and difficult life circumstances come, as well as for the implementation of the "Pole Method" in various environments.

The charitable projects are intended to support the development of the disabled children and those who suffer from a particularly burdensome and incurable disease and as well as to fulfill their dreams in a normal life. The Foundation is trying at all costs to help them believe in themselves. To believe that, owing to work and faith in success, what is seemingly impossible becomes possible!
